Important:

- Monitoring period: From June 1 to Thanksgiving
- Number of measurements recommended: ten (one measurement every two weeks)
- For optimal results:
 - Read the protocol carefully: www.environnement.gouv.qc.ca/eau/rsvl/transparence.pdf;
 - Take measurements between 10 a.m. and 3 p.m. and avoid windy or rainy conditions;
 - Spread out the measurements as best as possible over the entire monitoring period.
- If you are unable to take measurements due to the presence of algae or aquatic plants, or because of other factors impacting the condition of the lake's water, please indicate this in the appropriate box on the form (“Unable to take measurement due to...”).
- Do you expect to be away frequently? If so, train someone to replace you.
- Please enter your measurements in RELAIS no later than the end of October. After that date, you will no longer be able to enter your data directly into the platform's “Transparency Measurements” interface.
